British Values in Design Technology at Bisley Blue Coat C of E Primary Schoo'

Rule of Law

In design technology, children are expected to follow rules for specific pieces of equipment in our classroom to ensure it is a safe place to be. They understand it is their responsibility to follow rules.

Individual Liberty

Children are given opportunities to create their own designs following an initial design brief. They make their own decisions about appropriate materials to use when making products. Children have opportunities to work collaboratively and express their views to others.

Democracy

In design technology, when evaluating work, children are given opportunities to voice their opinions about what went well and what could be improved. They are able to vote on designs or makes that they like the most and make suggestions for future improvements or changes.

Tolerance of others with different faiths and beliefs

Children understand that people from different cultures, follow different faiths and have different rules about some foods. They are taught to be tolerant about each others views and appreciate them, showing understanding to different faiths and beliefs.

Mutual Respect

Children are taught that design technology is a subject that people can have differing views about and are encouraged to respect each other's views and opinions. They are able to give constructive praise and areas for development about another child's work in a fair and kind way.
